

# PRESENTATION DESIGN GROUP: UO ACADEMIC HONORS DISPLAY DISPLAY AND GRAPHICS

### Boren Scholarships and Fellowships

Boren Scholarships and Fellowships provide unique funding opportunities for U.S. undergraduate and graduate students to add an important international and language component to their education. They focus on geographic areas, languages, and fields of study that are critical to U.S. interests and are underrepresented in study abroad.

**2011 Recipients**

Ming Canaday China (spring)	Alexandra Rosenberg China (year)
Kelsey Jarone Brazil (spring)	Dennis Tanner China (year)

### Goldwater Scholarship

The Goldwater Award, created by Congress to honor the late Senator Barry M. Goldwater of Arizona, was given to 273 students in 2011 from 1,095 applications submitted by undergraduate sophomores and juniors in the U.S. The award is for juniors and seniors who plan to be scientists, mathematicians, or engineers.

**2011 Recipient** Courtney Klosterman

**2010 Recipient** Patricia MacQueen

### Fulbright U.S. Student Program

For more than sixty years, Fulbright student grants have been aimed to increase mutual understanding among nations through educational and cultural exchange, while serving as a catalyst for long-term leadership development.

**2011 Recipients**

Randianne Leyshon English Teaching Assistant Russia	Kate Margolis Psychology Spain
Tracey Gill Business Spain	Kelly Sky Environmental Studies India

### Hollings Scholarship

The National Oceanic and Atmospheric Administration (NOAA) Broad B. Hollings scholarship program fosters undergraduate learning in oceanic and atmospheric science, research, technology and education, including and preparing students for careers as teachers and educators in science and other related resource agencies.

**2010 Recipient** Robert McNulty

### National Science Foundation Graduate Research Fellowship

National Science Foundation Graduate Research Fellowships are awarded to outstanding graduate students pursuing research-based master's and doctoral degrees in NSF-supported scientific, technological, engineering, and mathematics fields. The NSF Graduate Research Fellowship Program is the nation's oldest graduate fellowship of its kind and its recipients have been known to contribute significantly over the course of their professional careers to research, teaching, and innovations in their field.
